

Product Requirements Document (PRD)

BrewQuest V1

Version: 1.0 (MVP)

1. Product Overview

Product Name

BrewQuest

Product Vision

BrewQuest is an AI-powered personal coffee companion that helps users discover, understand, and improve their coffee preferences through personalized recommendations, evolving Coffee DNA, and an interactive coffee journey.

Rather than acting as a traditional recommendation engine, BrewQuest becomes a companion that learns from every brew and grows with the user over time.

2. Problem Statement

Coffee drinkers often struggle with:

- Choosing the right coffee
- Understanding flavor profiles
- Remembering coffees they enjoyed
- Tracking brewing experiments
- Finding recommendations that match their personal taste

Most existing platforms focus on selling coffee rather than helping users build a long-term understanding of their preferences.

BrewQuest solves this by creating an evolving Coffee DNA that powers personalized recommendations and meaningful insights.

3. Target Audience

Beginner

New to coffee and looking for guidance.

Instant Coffee Lover

Enjoys instant coffee and wants better recommendations without overwhelming complexity.

Explorer

Interested in discovering new coffees, brewing methods, and flavors.

Enthusiast

Experienced coffee drinker looking for detailed information and refined recommendations.

4. Product Goals

- Build an engaging coffee companion.
 - Create personalized recommendations.
 - Develop an evolving Coffee DNA.
 - Encourage consistent Brew Log usage.
 - Make recommendations transparent and explainable.
 - Build a strong portfolio-quality MVP.
-

5. Core Product Principles

- Coffee is personal.
 - Every interaction improves future recommendations.
 - Users should understand why recommendations are made.
 - Beanii is a companion, not a chatbot.
 - The product should grow alongside the user.
-

6. Core Features

6.1 Authentication

- Email & Password

- Google Login
 - User Profile
-

6.2 Conversational Onboarding

Users are guided through an interactive onboarding experience to initialize their Coffee DNA.

Information collected includes:

- Coffee experience
 - Favorite flavors
 - Preferred roast
 - Brew methods
 - Instant coffee preference
 - Drinking habits
-

6.3 Coffee DNA

Coffee DNA is BrewQuest's personalized taste profile.

It evolves using:

- Brew Logs
- Ratings
- Favorites
- Brewing methods
- Flavor preferences
- Daily interactions

Coffee DNA continuously improves recommendation quality.

6.4 Beanii

Beanii is BrewQuest's AI Coffee Companion.

Responsibilities:

- Welcome users
- Explain recommendations
- Celebrate milestones
- Provide contextual coffee tips
- Introduce Beanii's Pick

Beanii is **not** a chatbot.

6.5 Beanii's Corner

Permanent hero section on the Home Dashboard.

Functions:

- Daily greeting
 - Today's vibe selection
 - Coffee insights
 - Personalized messages
 - Display Beanii's Pick
-

6.6 Beanii's Pick

Primary recommendation of the day.

Generated using:

- Coffee DNA
- Today's vibe
- Taste history
- Recent activity
- Brewing preferences

Each recommendation includes a clear explanation.

6.7 Recommended For You

Long-term personalized recommendations based on Coffee DNA.

6.8 Discover Something New

Introduces coffees outside the user's normal preferences to encourage exploration.

6.9 Brew Log

Users can record every coffee experience.

Each entry stores:

- Coffee
- Date
- Brew method
- Recipe
- Flavor ratings
- Overall rating
- Notes
- Optional image

The Brew Log acts as the primary learning source for Coffee DNA.

6.10 Coffee Database

Contains structured coffee information including:

- Coffee name
 - Brand
 - Origin
 - Roast level
 - Processing method
 - Flavor notes
 - Brewing compatibility
 - Bean/Instant classification
-

8. Recommendation Philosophy

BrewQuest uses three recommendation layers.

Layer 1 — Beanii's Pick

Context-aware recommendation influenced by today's situation.

Layer 2 — Recommended For You

Recommendations generated from long-term Coffee DNA.

Layer 3 — Discover Something New

Encourages exploration beyond existing preferences.

9. Homepage Structure

1. Beanii's Corner
 2. Beanii's Pick
 3. Recommended For You
 4. Discover Something New
 5. Continue Your Journey
 6. Coffee DNA
 7. Recent Brew Log
-

10. Non-Functional Requirements

- Responsive design
 - Fast loading experience
 - Mobile-friendly UI
 - Secure authentication
 - Explainable recommendations
 - Scalable architecture
 - Type-safe codebase
-

11. Technology Stack

Frontend

- Next.js
- React
- TypeScript
- Tailwind CSS

Backend

- NestJS
- Prisma ORM

Database

- PostgreSQL (Neon)

Authentication

- Better Auth

Storage

- Cloudinary

Analytics

- PostHog

Deployment

- Vercel
 - Railway or Render
-

12. Future Scope (Beyond V1)

- Community feed
 - Coffee Passport
 - Badges & achievements
 - Friends and sharing
 - AI conversation with Beanii
 - Seasonal recommendations
 - Weather-aware recommendations
 - Collaborative filtering
 - Mobile application
 - Marketplace integration
-

13. Success Metrics

- Onboarding completion rate
 - Brew Logs created per user
 - Daily active users
 - Recommendation engagement rate
 - User retention
 - Returning visitors
 - Average Brew Log quality
-

14. Product Pillars

The BrewQuest experience is built around three foundational pillars:

Beanii — The companion that guides and explains.

Coffee DNA — The evolving intelligence that understands the user.

Brew Log — The history that powers personalization and growth.

Together, these pillars create a product that helps users enjoy coffee today while continuously refining tomorrow's experience.
